Interview S Paper No 8), 7. Examiner's	nformal Patent Application (PTO-152) Summary (PTO-413), ./Mail Date s Amendment/Comment s Statement of Reasons for Allowance	

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 7-14, directed to a non elected species are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The restriction requirement between claims 1-18 and claim 19 is also withdrawn in view of applicant's arguments.

## **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The main reason for the allowance of claim 1 is that the prior art fails to disclose power steering device including a restriction device that sets a restricted relative rotational angle to be created by an actuator in one lateral direction equal to or smaller than a difference between a permissible rotational angle to be defined by an electric connection mechanism in the other lateral direction and a maximum possible rotational angle of an output portion in the other lateral direction, and controls a relative

Art Unit: 3611

rotational angle to be created by the actuator in said one lateral direction to an angle equal to or smaller than the restricted relative rotational angle. The main reason for the allowance of claim 19 is that the prior art fails to disclose a method including setting a restricted relative rotational angle to be created by the actuator in one lateral direction equal to or smaller than a difference between a permissible rotational angle to be defined by the electric connection mechanism in the other lateral direction and a maximum possible rotational angle of the output portion in the other lateral direction; and controlling a relative rotational angle to be created by the actuator in said one lateral direction to an angle equal to or smaller than the restricted relative rotational angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Hurley whose telephone number is 703-308-0233. The examiner can normally be reached on Monday-Friday 9:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on 703-308-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
